# How to setup Keil µVision DFP

A trivial guide for setting up Keil µVision Device Family Pack.
You can find information on this setup on the following link.

1. **Verify the correct DFP (Device Family Pack) for LPC1768 devices (for next labs)**

Pack installer window is going to open, select the correct System-on-Chip (LPC1768).

Select the device specific and install (or verify) the correct version of DFP, it must be 2.7.1.
